TABLE OF CONTENTS
Volume XXIV

September, 1955

A Study of Professional Distances Between the Raters of Teachers and Teachers Rated: Earl Martin Grotke 1

An Investigation of the New York State Regents Examinations in Science: George Greisen Mallinson and Jacqueline V. Buck 43

A Comparison of Wechsler Children's Scale and Stanford-Binet Scores for Eight- and Nine-Year Olds: Frank C. Arnold 91

December, 1955

The Effects of a "Causal" Teacher-Training Program and Certain Curricular Changes on Grade School Children: Ralph H. Ojemann, Eugene E. Levitt, William H. Lyle, and Maxine F. Whiteside 95

The Selection of Candidates for Teacher Education at the University of Wisconsin: Gustave John Stoelting 115

Differential Methods of Solving Selected Problems on the ACE Psychological Examination: Leone Anderson, Richard Rankin, Joy Richardson, Julius Sassenrath, and Julius Thomas 133

March, 1956

The Inductive-Deductive Method and the Physical Science Laboratory: Arnold M. Lahti 149

Empirical Comparison of Six Cessation Tests for Use in Principal Components Factor Analysis: John E. Stecklein 165

The Stability of Equated Test Scores: Bertram P. Karon 181

Group-Study versus Lecture-Demonstration Method in Physical Science Instruction for General Education College Students: John N. Ward 197

Experimental Studies of the Use of Audio-Visual Aids in Vocational Agriculture: Ralph R. Bentley 211

Analysis-of-Variance Models and Their Use in a Three-Way Design Without Replication: Donald M. Medley, Harold E. Mitzel, and Arthur N. Doi 221

The Multiple Group Method of Factor Analysis and Rotation to a Simple Structure Hypothesis: Paul Horst and K. W. Schaie 231

An Analysis of Variance Method for Determining the External and Internal Consistency of an Examination: William J. Moonan 239

Analysis-of-Variance Models and Their Use in a Three-Way Design Without Replication: Donald M. Medley, Harold E. Mitzel, and Arthur N. Doi 221

The Multiple Group Method of Factor Analysis and Rotation to a Simple Structure Hypothesis: Paul Horst and K. W. Schaie 231

An Analysis of Variance Method for Determining the External and Internal Consistency of an Examination: William J. Moonan 239

Sampling Error Due to Choice of Split in Split-Half Reliability Coefficients: Frederic M. Lord 245

June, 1956

A Simple Method for Rotating a Centroid Factor Matrix to a Simple Structure Hypothesis: Paul Horst 251

Occupational Expectations of Twelfth Grade Michigan Boys: E. Grant Youmans 259

A Brief Discussion of One of the Analyses in the Experiment—The Effect of the Systematic Analysis of Errors on Achievement in the Study of Fractions: Orville B. Aftreth 273

A Follow-up of an Experimental Teaching Method in Music at the Fourth and Fifth Grade Levels: Carl B. Nelson 283

Does an Honor System Reduce Classroom Cheating? An Experimental Answer: Ray R. Canning 291

The Comparability of the Simple Discriminant Function and Multiple Regression Techniques: William B. Michael and Norman C. Perry 297

The Influence of Item Modality on the Dimension Measured by a Test: Donald M. Medley 303

Power of the Rank, Median and Run Tests When Ties are Numerous—Empirical Study: Merle W. Tate 309

Factor Analysis of High School Variables and Success in University Subjects for the First Semester in the University: Elizabeth C. Baker and George A. Baker 315

A Comparison of the Accuracy of the Formula for the Standard Error of Pearson "r" with the Accuracy of Fisher's z-Transformation: Harvey F. Dingman and Norman C. Perry 319

A Predictive Confidence Interval for the Validity Coefficient: R. B. McHugh 323
